MONTMELÓ OUTSOLE LINE

Outsole E.V.A (ethylene, vinyl and acetate) + rubber, HRO (resistant up to 300° C), whose design is inspired by the racing tires of high competition, offering besides great comfort and flexibility, the highest grip and non-slip on both smooth and rough surfaces, antistatic, with shock absorber, resistant to hydrocarbons and SRC.
Directive EN ISO 20345:2011

INSOLE MAX COMFORT LINE

The anatomical and lightweight design of the insole with honeycomb structure endorsed and tested by our ergonomics and podiatry department, provides a high level of comfort and freshness given its maximum cushioning and breathability..
